Subject Index

tt = technical tip

abl oncogene, homologue in *Drosophila* 69
Ac transposon, maize 334
Adaptive response to mutagens
  Bacillus subtilis 54
  E. coli 51
Adenine phosphoribosyl transferase (aprt) 294, 343
Adenovirus
  E1A gene products 145
  suppression of MHC expression by E1A 298
Adhesion molecules 213
Agrobacterium rhizogenes transformation of alfalfa (tt) 233
Agrobacterium tumefaciens
  transformation of tobacco 334
Albumin gene 122, 124
Alpha satellite DNA 192
Alpha-fetoprotein gene 124
Alzheimer's disease 59
Amber suppressors, *C. elegans* 327
Amino acid biosynthetic operons 356
Amoebae, *Physarum polycephalum* 208
Amyloid protein and Alzheimer's disease 59
Androgenetic embryos 25
Antenna, *Drosophila* 139
Antennapedia locus, *Drosophila* 87, 139
Antisense transcription, c-*myc* oncogene 49
ATP synthase genes, chloroplast 282
Attenuation, transcriptional 356
Avirulence, plant fungal 158

B cells
  chicken 248
  immunoglobulin gene transcription 238
  tumours 11
Bacillus subtilis
  adaptive response to mutagens 54
  lack of palindromic units 226
Bacteriophage
  recombination hotspots 7
  replication 198
  site-specific DNA inversion 262
  translation 237
Barley, fungal resistance 159
Becker muscular dystrophy 33
Biotin-11-dUTP as a probe for nascent DNA in isolated nuclei (tt) 233
Biotinylated probe, Y-specific for sex determination (tt) 64
Biotrophic fungus 158
Bithorax locus, *Drosophila* 44, 87
Burkitt's lymphoma 12, 50, 299
Bursa of Fabricius 249

Cadherin 213
Caenorhabditis elegans
  mutator strains 224
  suppression 325
  Tc1 transposon 222
  unc mutants 222, 325
Cancer, carcinogenesis
  gene mutation studies 293
  genetic risks from radiation 152
  myc oncogene (c-*myc*) 47
  role of glycosylation 81
  suppression of MHC gene expression 298
  targeted expression of oncogenes in transgenic mice 306
  translocations in B- and T-cell tumours 11
  tumours in *Xiphophorus* 41
Capreomycin sulphate, selection for viomycin phosphotransferase (tt) 240
Carbohydrate biosynthesis mutants 77
Cattle
  embryo manipulation 65
  gene mapping 67
cDNA libraries, storage (tt) 273
Cell adhesion molecules (CAM) 75, 213
Cell cycle
  Physarum polycephalum 210
  yeast 145
Cell lineage
  leech 314
  mammalian neural crest 259
Centromere
  alpha satellite DNA 192
  DNA replication 275
  yeast artificial chromosome 173
Chi sites, bacteriophage 7
Chicken immunoglobulin genes 248
Chimaera 119, 162
  aggregation 25, 66
Chinese hamster ovary cells 77, 294
Chlamydomonas
  chloroplast transformation 337
  rhythm mutants 185
  trans-splicing of chloroplast DNA 286
Chloramphenicol acetyltransferase (CAT) assays (tt) 332
Chloroplast
  genome 281
  transformation 337
Chorion formation, *Drosophila* 303
Chromatin 16
  extraction from plants (tt) 89
  fragile sites 274
Chromosome jumping 167
Chromosome
  analysis by machine 309
  bands 16, 312
  fragile sites 274
  maternal and paternal, roles in development 25
  nucleosomes 17
  puffs 288
  scaffold 17
  structure analysis by PFGE 170
  translocations 11, 33, 152
Chromosome-mediated gene transfer (CMGT) 173, 177
Chronic granulomatous disease 149
  revised sequence of *CGD* gene 207
Ciliates, DNA excision 235
Circadian rhythms 185
Cloning
  chromosome-mediated gene transfer 177
  in yeast 173
  pulsed field gel electrophoresis 170
Coding strand detection with single-stranded probes (tt) 2
Collagen gene, insertional mutagenesis 162
Concerted evolution, palindromic units in bacteria 230
Congenic mouse strains 97
Congenital malformations, radiation-induced 154
copia element, *Drosophila* 45, 88

Coronavirus, recombination 60
Courtship behaviour, *Drosophila* 141
CpG islands 342
  (*see also* HTF islands)
Cranial neural crest, mammalian 259
Creutzfeldt-Jacob disease 59, 117
Cystic fibrosis 170, 181, 345
Cytochrome
  b in neutrophils 150, 207
  mitochondrial 339
Cytoplasmic male sterility 340
Cytotoxic T lymphocytes 272, 298

DAPI, use in cell viability assays (tt) 341
decapentaplegic locus, *Drosophila* 96
Dictyostelium discoideum, homologous recombination 174
Dihydrofolate reductase (dhfr) 106, 294, 345
DNA polymerase
  eukaryotic 31
  evolution 201
DNA
  alpha satellite 192
  extraction from eukaryotic cells (tt) 341
  fingerprinting (tt) 89
  fragile sites 274
  methylation 1, 167, 277, 342
  purification from plasmids (tt) 148
  repair 1, 31, 51
  repetitive 192, 226
  replication 198, 274
Dorsal–ventral pattern genes, *Drosophila* 91, 303
Dosage compensation
  Drosophila 45
  mammalian 252, 279
Down syndrome 59, 154
Drosophila ananassae, eye mutations 85
Drosophila melanogaster
  antennal mutants 139
  Antennapedia locus 87, 139
  bithorax locus 44, 87
  cell marker for detecting X-linked embryonic lethal mutations (tt) 176
  chromosome puffing 288
  chromosome scaffold 18
  courtship 141, 187
  decapentaplegic (Hind) locus 96
  Dint-1 gene *(wingless)* 269
  DNA replication 274
  dorsal–ventral pattern genes 91, 303
  dosage compensation 45
  ectopic fibres 276
  gap genes 127
  glue genes 19, 288
  homeotic genes 87, 123, 129, 139
  hybrid dysgenesis 88
  intercalary heterochromatin 274
  Krüppel gene 127
  learning mutants 141
  maternal-effect genes 91, 127
  Minutes 85, 347
  neurogenetics of olfaction 137
  Notch locus 96
  olfactory genes 137
  oogenesis 303
  P element 46, 88, 223
  P element vectors (tt) 176
  pair rule genes 129
  per locus 185
  proto-oncogenes 69, 269
  ribosome synthesis 347
  rhythm mutants 187
  salivary glands 288
  segmentation genes 127, 270
  Sgs genes 19, 288
  Toll locus 94
  transposable element 45, 85, 87
  transvection 44
  white locus 43
  wingless mutation 269
  zeste locus 44
Drosophila simulans, courtship song 187
Duchenne muscular dystrophy 33, 170

Ecdysterone 289
Echidna, sex chromosomes 252
Ectopic fibres 276
Epidermal growth factor (EGF)
  homologous *Notch* product 96
  receptor 70
Egg development, *Drosophila* 303
E1A oncogene
  gene products 145
  suppression of MHC gene expression 298
Electron transport genes
  chloroplast 282
  mitochondria 339
Embryo manipulation 25, 65, 119, 162
Embryo transfer, mouse (tt) 332
Embryo-lethal mutants, maize 3
Embryogenesis
  Drosophila 91, 127, 303, 348
  expression of cadherins 215, 269
  leech 314
  maize 3
  mouse 23, 123, 162, 213, 257
  neural crest cell migration in mammals 257
  regulatory genes 123
  role of proto-oncogenes in pattern formation 269
Embryonal carcinoma (EC) cells 119
Embryonal stem cells (ES, EK) 119, 162
Endosperm formation in maize 3
Enhancers
  chromosome scaffold 18
  immunoglobulin genes 121
  nuclear oncogenes 145
  recombinational, in bacteria 262
  (*see also* Promoters/enhancers)
Enterobacteria
  palindromic units 226
  site-specific recombination 262
  transcription attenuation 356
Epistatic suppression, *C. elegans* 326
Epstein Barr virus (EBV) 12, 299
erb-A oncogene 334
erb-B oncogene, homologue in *Drosophila* 69
Escherichia coli
  adaptive response 51
  DNA repair 1
  membrane transport proteins 62
  palindromic units 226
  recombination 262
  ribosomal proteins 236
  rRNA synthesis 236
  SOS response 51

  albumin gene 124
  alpha-fetoprotein gene 124
  cadherins 213
  chimaera 25, 119, 162
  dilute mutation 162
  embryo transfer (tt) 332
  embryonal stem cells 119
  evolution 243
  genetics of body scent 97
  insertional mutagenesis 162
  int-1 proto-oncogene 269
  limb deformity (ld) mutants 163
  major histocompatibility complex 7, 97, 107
  Mov mutants 162
  myelin genes 73
  neurological mutants 74
  nuclear transfer 23
  ontogeny of T-cell receptor expression 132
  scrapie incubation *(Sinc)* genotype 117
  somatic cell hybrids 177
  spermatogenesis 351
  T/t locus 124, 353
  targeted expression of oncogenes 306
  targeted mutagenesis 119
  transgenic 66, 162, 205, 306, 332
  V gamma genes 271
mRNA (messenger RNA)
  polyadenylation 238
  splicing 48, 102, 238
  stability 50
  terminator 357
Multidrug resistance gene 63
Multigene families, evolution 107
Muscle protein genes, *C. elegans* 222, 325
Mutagens, mutagenesis
  alkylating agents in *E. coli* 51
  analysis in human cells 294
  cytosine residues 342
  ionizing radiation 155
  retrovirus vectors 120, 162
  transposable elements 85
Mutator strains, *C. elegans* 224
myb (c-*myb*) oncogene 145
  homologue in *Drosophila* 69
myc (c-*myc*) oncogene 47, 145
  rearrangement in Burkitt's lymphoma 12
  targeted expression in transgenic mice 306
myc (N-*myc*) oncogene 299
Myelin genes and proteins 73
Myosin
  C. elegans 325
  Dictyostelium discoideum 174

N-CAM (neural cell adhesion molecule) 75
Necrotrophic fungus 158
Neisseria gonorrhoeae, surface antigen variation 319
Neural crest cell migration, mammalian 257
Neuroblastoma 299
Neurospora
  rhythm genes 185
  rRNA genes 343
  splicing in mitochondria 339
Neutrophil, b-cytochrome 150, 207
Nicotiana tabacum, see Tobacco

Nod proteins, *Rhizobium leguminosarum* 63
Non-disjunction of chromosomes 153
Nonsense suppressors, *C. elegans* 327
Notch locus, *Drosophila* 96
Nuclear matrix 18
Nuclear transfer 23
Nucleoid, bacterial 229
Nucleosomes 17

Olfaction in *Drosophila* 137
Oncogenes
  activation by translocations 12
  c-*myc* regulation 47
  genetic tumours in *Xiphophorus* 41
  homologues in *Drosophila* 69
  MHC gene expression 298
  nuclear 145
  pattern formation 269
  selectable markers in chromosome-mediated gene transfer 177
  targeted expression in transgenic mice 306
  trans-acting factors 333
  (*see also* names of individual oncogenes)
Oogenesis
  Drosophila 303, 348
  mammalian 23, 152
Opacity protein, *Neisseria gonorrhoeae* 320
Operon, bacterial 356
Oxytricha, DNA rearrangement 235

P element *Drosophila* 46, 85, 88, 223
P element vectors (tt) 176
Palindromic units in bacteria 226
Paramecium, DNA rearrangement 235
Parthenogenetic embryos 25
Pattern formation
  dorsal–ventral 91, 303
  role of proto-oncogenes 269
  segmentation genes 129
Pearson, Karl 113
Penrose, Lionel 113
per locus, *Drosophila* 185
Phage, *see* Bacteriophage
Phagocytes 149
Phenylketonuria (PKU) 112
Philadelphia chromosome 11
Photosynthesis genes, chloroplast 282
Physarum polycephalum 208
Picornavirus 60
Pigs, transgenic 66
Pilin proteins, *Neisseria gonorrhoeae* 319
Plant chromatin extraction (tt) 89
Plasmid
  mitochondrial killer 337
  purification of DNA (tt) 148
  small-scale preparation in microtitre plates (tt) 273
Plasmodia, *Physarum polycephalum* 208
Platypus, sex chromosomes 252
Poliovirus 60
Polyadenylation, immunoglobulin genes 238
Polymorphism
  alpha satellite DNA 195
  bacterial palindromic units 226
  hypervariable minisatellites 9
  mouse MHC 108
  Neisseria surface antigens 319
  (*see also* Restriction fragment length polymorphism) 288
Polytene chromosomes 288
Position effects on gene expression 46
Prentis, Steve 90
Primase 198
Primates, evolution 243
Prion 117
Promoters/enhancers 125, 333
  albumin gene 122
  Drosophila glue gene 289
  Drosophila white gene 43
  immunoglobulin genes 121
  myc oncogene 48
  nuclear oncogenes 145
  tissue-specific 121, 306
Protein kinase
  homologue in *Drosophila* 70
  oncogene products 334
Proto-oncogenes
  Drosophila 69
  expression in spermatogenesis 354
  nuclear 145
  role in pattern formation 269
Protoplasts
  tobacco, gene transfer (tt) 176
  yeast, preparation (tt) 176
Protozoans, ciliated 235
Prp protein in scrapie 117
Pseudoautosomal region 255
  recombinational hotspot 10
Pseudogenes, chicken immunoglobulin genes 250
Puffing of chromosomes 288
Pulsed field gel electrophoresis (PFGE) 36, 167, 174, 181

Quantitative trait locus, maize 221
quiverer mutation, mouse 75

Rabbit, transgenic 66
Radiation
  genetic risks 152
  ultraviolet 196
raf (c-*raf*) oncogene, homologue in *Drosophila* 69
ras oncogenes
  homologues in *Drosophila* 69
  selectable markers in chromosome-mediated gene transfer 117
  targeted expression in transgenic mice 306
Recombinant inbred (RI) lines, maize 220
Recombinase
  bacterial 262
  eukaryotic 10, 11
Recombination
  alpha satellite DNA 196
  and disease 183
  chicken immunoglobulin genes 251
  DMD locus 36
  fragile sites 276
  homologous 120, 174
  hotspots 7
  hypervariable minisatellites 9
  immunoglobulin loci 11, 251
  mouse MHC 7, 107
  Neisseria gonorrhoeae pilin genes 321
  RNA viruses 60
  site-specific, in bacteria 262
Regulatory genes in development 123
Repeated sequences
  alpha satellite 192
  in bacteria 226
  L1 180
  minisatellites 9, 89, 305
Reprogramming in embryonic development 23
Restriction enzymes 167, 342
Restriction fragment length polymorphism (RFLP) 305
  livestock animals 67
  maize 217
Restriction site creation (tt) 2
Retrovirus 334
  insertional mutagenesis 162
  replication 200
  vector 120
Reverse transcriptase 200
RFLP, *see* Restriction fragment length polymorphism
Rhizobium leguminosarum, nod proteins 63
rho-dependent termination 228
Rhythm genes 185
Ri plasmid, transformation of alfalfa (tt) 233
Ribosomal proteins 236
  chloroplast 283
  Drosophila 347
Ribosome
  synthesis in *Drosophila* 347
  transcription attenuation 357
rRNA (ribosomal RNA) 236
  chloroplast genes 283
  Drosophila 347
  mitochondrial 337
  sequence divergence 244
RNA polymerase
  bacterial 356
  chloroplast 286
  eukaryotic 121
  mitochondrial 337
RNA viruses 60, 199
Rodents
  cranial neural crest cell migration 257
  evolution 243

Saccharomyces cerevisiae, see Yeast
Salivary gland chromosomes, *Drosophila* 288
Salmonella typhimurium
  palindromic units 226
  site-specific in version in flagellin genes 262
Satellite DNA 9, 89, 192, 305
Scent, genetics of 97
Scrapie 57, 117
Segmentation genes, *Drosophila* 127, 270
Seminiferous tubules 351
Senile dementia 59
Sertoli cells 351
Sex determination
  C. elegans 326
  livestock 66
  mammals 252
  use of biotinylated Y-specific probe (tt) 64
Sex ratio, control in livestock 66
Sheep
  embryo manipulation 65
  nuclear transfer 24
  transgenic 66
Shine–Dalgarno sequence 237
shiverer mutation, mouse 74
Shuttle vectors, use in mutation analysis 295

Silver staining to detect mitochondrial DNA variation (tt) 64
Slime mould
  Dictyostelium discoideum 174
  Physarum polycephalum 208
snRNPs (small nuclear ribonucleoproteins) 103
Somatic gene therapy 112
SOS response, *E. coli* 51
Southern analysis on small numbers of cells (tt) 273
Spermatogenesis
  effect of ionizing radiation 152
  gene expression 351
  mammalian 23
Spheroplasts, storage (tt) 148
Spliceosome 103
Splicing 102
  alternative 48
  immunoglobulin genes 238
  mitochondrial 339
  trans-splicing in chloroplasts 286, 337
src (c-*src*) oncogene, homologue in *Drosophila* 69
Steroid sulphatase 252
Streptomyces, viomycin phosphotransferase selection (tt) 240
Superoxide, impaired production in chronic granulomatous disease 149
Suppressors
  C. elegans 325
  informational 237
SV40
  T antigen 146
  enhancer 333

T-cell receptor (TCR) 14
  ontogeny of gene expression 132
  V gamma genes 271
T/t locus, mouse 124, 353
T-cell tumours 14
Testis-determining factor (TDF) 252
Tetrahymena
  DNA rearrangement 235
  mitochondria 337
  splicing 105
TF IIIA transcription factor 130
Thymus, ontogeny 132, 272
Tobacco
  chloroplast genome 281
  gene transfer into protoplasts (tt) 176
  mobilization of Ac transposon 334
Toll locus, *Drosophila* 94
Topoisomerase II 18
Trans-acting factors 145
  AP-1 333
  bacterial recombinational enhancers 265
  chromosome scaffold 21
  CpG islands 346
  cytochrome oxidase genes 339
  Drosophila glue genes 291
  jun oncogene 333
  tissue-specific 43, 121, 125
Transcription
  active chromatin 16, 346
  and replication 201
  and splicing 102
  chloroplast 286
  termination, in bacteria 227, 356
  tissue-specific 121, 238, 344
Transforming growth factor (TGF) β, homology to *Drosophila Hind* product 96
Transgenic animals in agriculture 66
Transgenic mice 66
  embryo transfer (tt) 332
  immunoglobulin gene rearrangement 205
  insertional mutagenesis 162
  targeted expression of oncogenes 306
Translation 236, 356
  chloroplast 283
  mitochondrial 339
Translational control
  Neisseria opacity protein expression 322
  protamine gene expression 353
Translocations
  B–A, in maize 220
  B- and T-cell tumours 11, 50
  Duchenne and Becker muscular dystrophy 33
  radiation-induced 152
Transposable elements
  Drosophila 85, 87
  maize Ac element 334
  Tc1 transposon in *C. elegans* 222
Transposon tagging
  C. elegans Tc1 transposon 224
  Drosophila white gene 43
  maize Ac element 335
Trisomy
  Down Syndrome 154
  radiation-induced 153
tRNA
  C. elegans tRNA^{TRP} gene 327
  organelle 283, 337
  role in transcription attenuation 356
Tumour suppressor genes 39
Tumours, tumorigenesis
  B- and T-cell 11
  genetic, in *Xiphophorus* 38
  glycosylation 81
  int-1 oncogene 269
  suppression of MHC gene expression 298
  transgenic mice 306

Ultradian rhythms 185
Ultraviolet light, mutagenic effects 296
unc mutants, *C. elegans* 222, 325
Unconventional slow virus 117
Upstream element, *see* Promoters/enhancers
Uvomorulin 213

Variegating position effects 46
Virulence, plant fungal 158
Virus, RNA 60
Virus-associated cancers 299

Western blots, erasure (tt) 148
white gene, *Drosophila* 43
Wilms' tumour 181
wingless mutation, *Drosophila* 269

X chromosome
  CGD locus 149, 207
  CpG islands 345
  dosage compensation 45, 229, 252
  DMD locus 33
  Drosophila 44, 138
  evolution 252
  fragile sites 274
  inactivation 253, 279, 342
  mouse 74, 100, 120
X-linked disease 183
  chronic granulomatous disease 149, 207
  Duchenne muscular dystrophy 33
  Lesch-Nyhan disease 119, 162, 293
Xenopus laevis
  maturing and fertilizing oocytes (tt) 240
  TF IIIA transcription factor 130
Xeroderma pigmentosum 296
Xiphophorus 38

Y chromosome
  evolution 252
  recombination hotspot 10
  role in chemosensory identity 100
Yeast
  artificial chromosome, for cloning 173
  cell cycle 145
  GCN4 transcription factor 333
  mating type 123
  mitochondrial genes and mutants 337
  preparation of protoplasts (tt) 176
  rRNA synthesis 236

Zea mays, *see* Maize
zeste gene, *Drosophila* 44
Zygote
  maize 3
  mammalian 23
Zygotically active genes, *Drosophila* 92, 127
